

Monitor your energy from anywhere!

Instantly see the cost of using energy in your home

View energy use on our web portal or smartphone app

Download your daily, weekly, monthly or average data

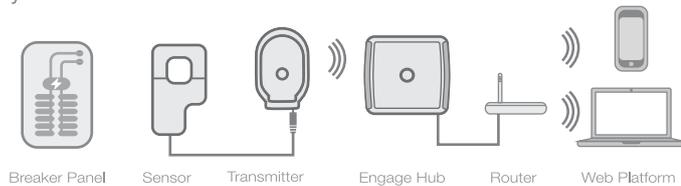

Discover and reduce your carbon footprint

Use the engage hub to reduce your home energy use

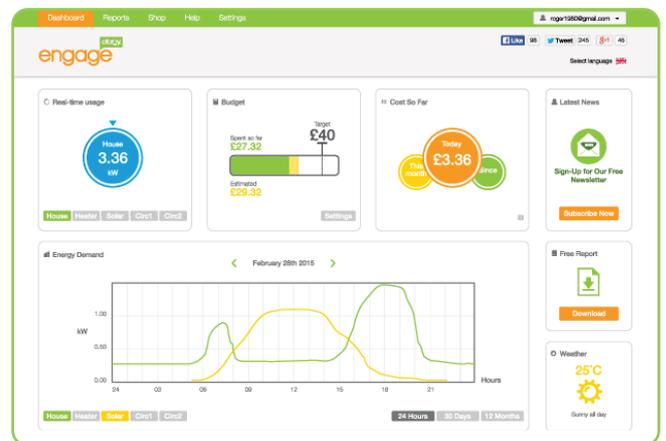

Our **engage hubs** are simple to install and use. One **CT sensor** is clipped onto the live feed cable of your breaker panel. A lead from the sensor is connected to the efergy transmitter, which then wirelessly sends real time data to the hub. The **engage hub** is connected to your internet router via ethernet cable. The web platform or app will then show you how much energy you are using in the same units that are on your bill.

engage online platform features

- Access your energy data in real-time, anytime, from anywhere.
- See your energy data on our free platform and apps for Android, iPhone and iPad.
- View your daily, weekly, monthly or average costs in easy-to-read graphics.
- Download your daily, weekly, and monthly energy data report onto your PC/Mac.
- Set your monthly budget and see how close you are to meeting it.
- Compare your energy over 12 months and see where your costs are highest.
- Choose to view your energy data in £'s, kWh or CO₂.
- Discover and reduce your carbon footprint.
- Use the engage hub solo kit to track reductions in your household energy.

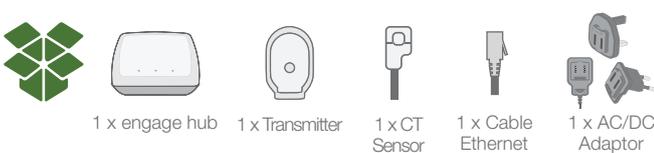

Technical details

Model Name:	engage hub
Model Number:	HH-2.0
Frequency:	433.5MHz
Engage Hub Power:	Changeable Adaptor
Dimensions:	84x80x27mm
